

One-time Setup: Install the Mobility Print app on your Android device

* You must be on the YaleSecure Network and logged into VPN

PaperCut Mobility allows you to touchless print by releasing the print job from a Blueprint queue using a mobile device.

Install the Mobility Print app on your Android device before printing. You must be on the Yale Secure Network and logged into VPN. For details, see [Off Campus Access VPN: Setup and connect to Yale VPN with your Android Devices](#).

- 1 Install the Mobility Print app from the Google Play Store.
- 2 Launch the Mobility Print app. Tap to check the Mobility Print Service is on.
- 3 Mobility Print will display in the list of Print Services.

How to add the PaperCut Print Release icon to your device's home screen

* You must be on the YaleSecure Network and logged into VPN

You can add the PaperCut Print Release icon to your iOS device's home screen for easy access.

- 1 In your browser, navigate to <https://ypps.yale.edu/mobileprint/release/login>. Click the three-dot icon.
- 2 Select **Add to Home Screen**.
- 3 Touch and hold to place the icon on your home screen.
- 4 You can rename the icon, if desired.
- 5 The PaperCut Release icon will be added.
